

## Wando Welch Terminal – Advanced Gate System

### Motor Carrier AGS Enhancement:

When a driver arrives at the inbound kiosk and the AGS has a match between the drop off Gate Code and the container/chassis, the kiosk will automatically display the drop off Gate Code. This saves the driver from having to enter drop off code Gate Code.

*(If the Gate Code does not match what the driver has been provided, the Gate Code can be Cleared and the correct Gate Code can be entered.)*

This enhancement will be in production on Saturday 9/10/2016.

**SOUTH CAROLINA PORTS** **Wando Welch Terminal**

**Enter Gate Code for Drop Off**
